

VALUE OF INTEGRATING LIFESTYLE AND MOBILITY RECOGNIZED

Americans increasingly support transit oriented development. They value the opportunity to more fully integrate lifestyle with mobility options, and they are rethinking priorities when deciding where to live and how to travel for work and play. Evidence of this trend includes support for changes in land use and zoning regulations in their communities and a willingness to pay more for mortgages or rent to live near transit stations, along with a growing desire to live near transit stations.

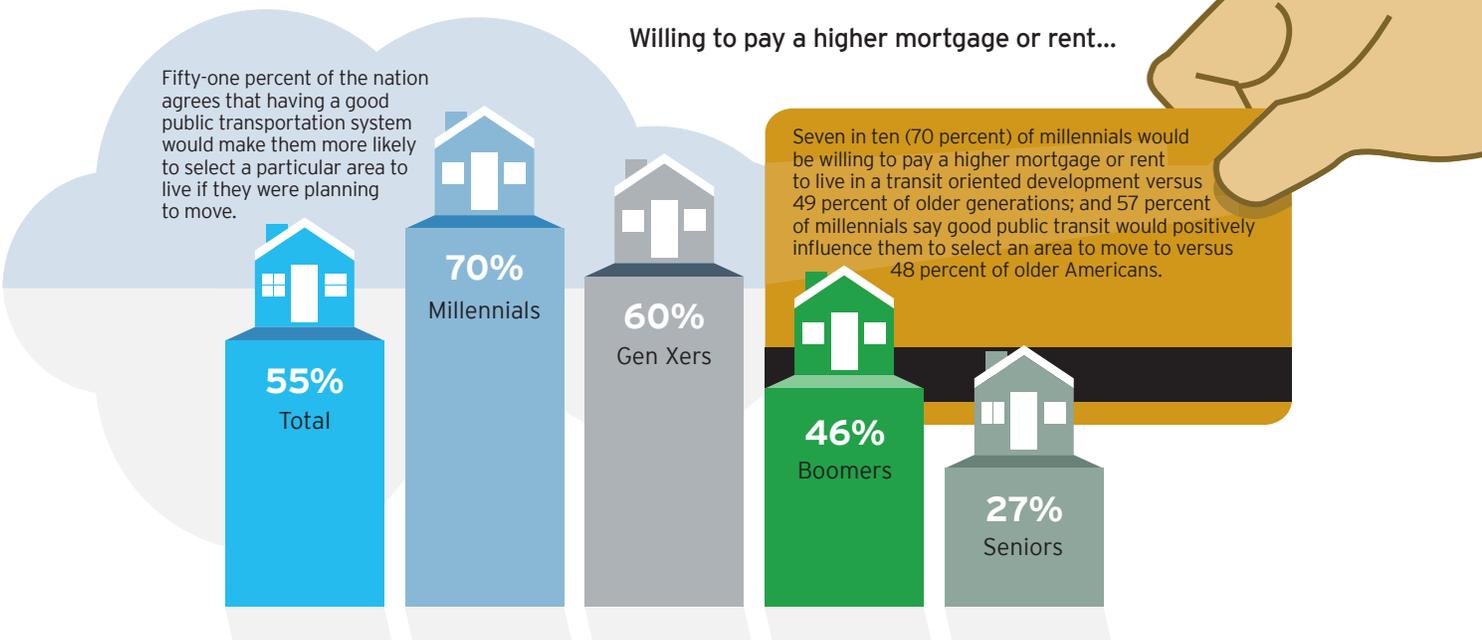

AMERICANS SUPPORT TRANSIT ORIENTED DEVELOPMENT

The desire for convenient transportation is why nearly three in four (73 percent) of Americans would support changing land use or zoning regulations in their communities to encourage transit oriented development.

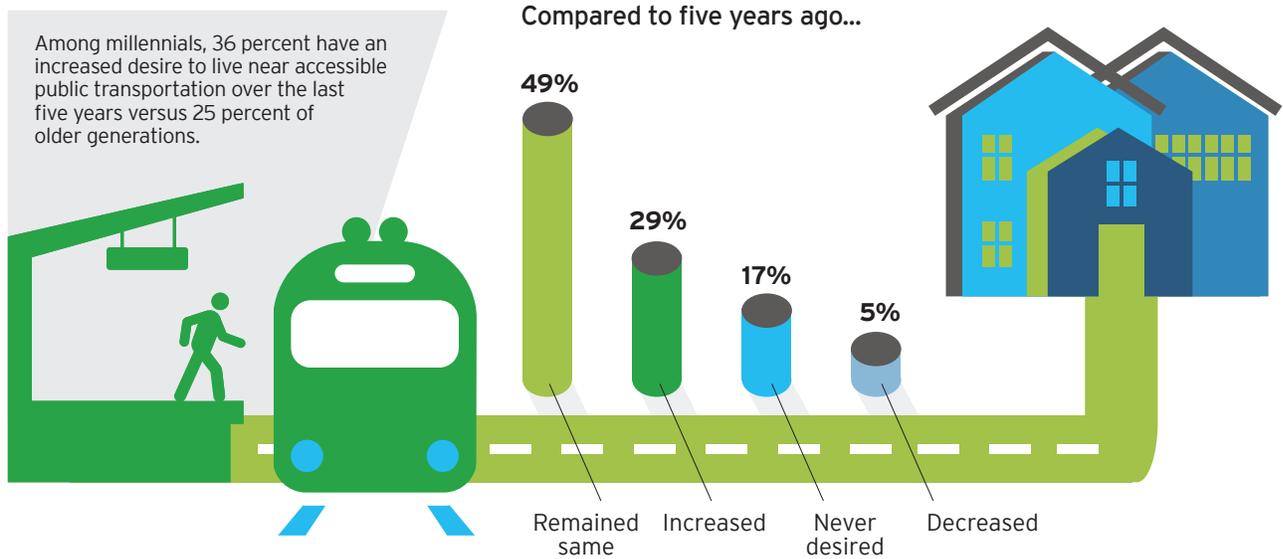

WILLING TO PAY FOR PROXIMITY

More than half (55 percent) of Americans would be willing to pay a higher mortgage or rent to live in an area where they could get to places for work and play without using a vehicle.

GROWING DESIRE TO LIVE NEAR PUBLIC TRANSPORTATION

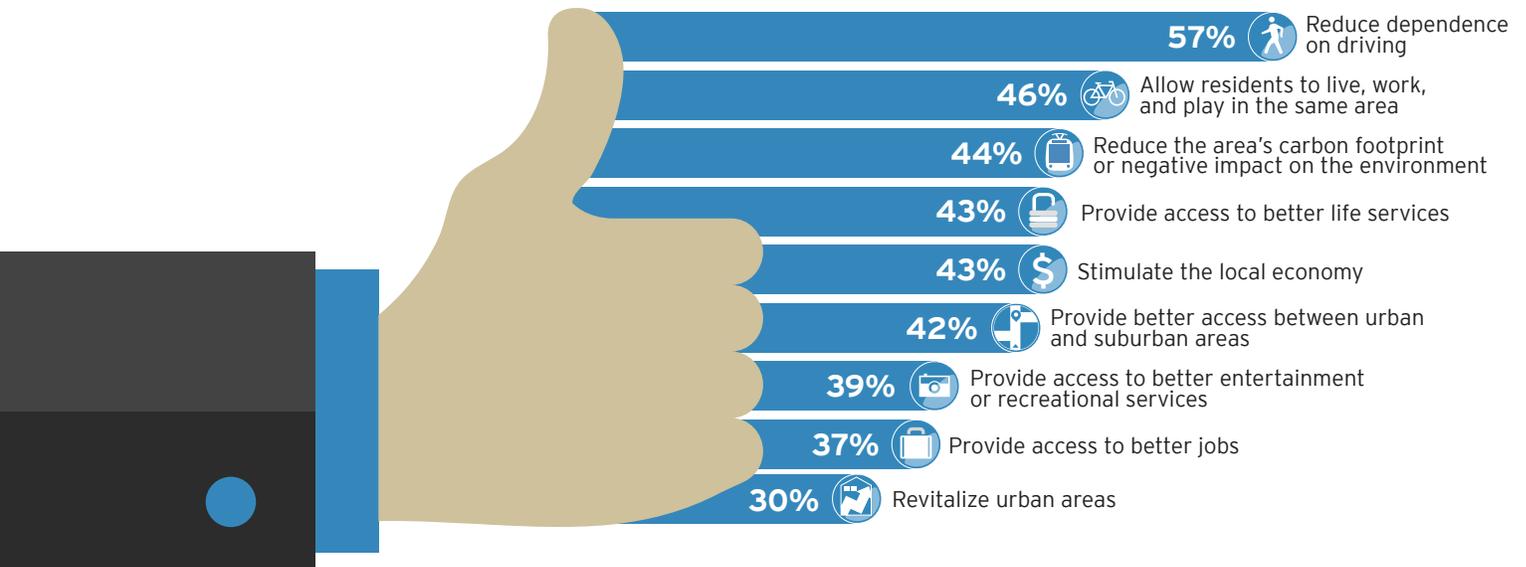

The desire to live near public transportation has increased in the last five years among 29 percent of Americans.

BENEFITS OF TRANSIT ORIENTED DEVELOPMENT

Americans believe transit oriented development provides an array of benefits ranging from lifestyle to environmental to economic.

Which of the following do you think would be true...

HNTB's America THINKS "Transit Oriented Development in America" survey polled a random nationwide sample of 1,002 Americans between April 6 and April 13, 2016. It was conducted by Kelton Global, which used an e-mail invitation and online survey. Quotas were set to ensure reliable and accurate representation of the entire U.S. population ages 18 and over. The margin of error is +/-3.1 percent. For more information, visit www.hntb.com or contact David Fridling (917) 438-0900, dfridling@hntb.com
